Colloidal Silver for Your Dog

We suggest using colloidal silver as a topical remedy for skin irritations such as itchy skin, hot spots, burns, wounds, ringworms, skin allergies like rashes or redness. However, that's not all. You'll find that colloidal silver tends to have antifungal, antiseptic and disinfectant properties as well. The silver ions present in the solution easily penetrate molecules and destroy pathogens of all kinds such as parasites, viruses, fungi, and bacteria.

Benefits:

- Relieves minor skin irritations, such as burning, itching, hot spots, and rashes
- Soothe mild allergic reactions and flea bites
- Promote the healing of minor cuts and scratches

How to Use:

Shake the bottle well before use as the various oils tend to float to the top of the solution. Spray on the affected area as needed. Do not rinse. Store in a dark place at room temperature.

Warning:

- For External Use Only, Non-Toxic, Non-GMO
- For Dogs Only / Do Not Use on Cats
- Never Spray into the Eyes or Nose
